## School Cadets Win Army and Navy Trophy

Leader A. Podesta is Also Awarded Medal

Word was received by principal King this week informing him that Redcliff cadets have again won the Army and Navy Trophy this year. This will be good news to the citizens of Redcliff who are proud of the cadets and who appreciate the interest taken in this line by Mr. King.

The Army and Navy Veterans Trophy is awarded to the smartest team of 16 Cadets in form in physical training and pyramid building. The award of the shield which this year comes back to Redcliff brings with it a grant of twenty dollars for the school for special proficiency in P. T. and the leader of the team, Albert Podesta is awarded the Lord Strathcona medal beautifully engraved with his name and the words "A leader of men" written in Latin.

The percentages obtained by the three highest competitors in the recent competitions for the Army and Navy Veterans Trophy and the Gravelly Shield have just been announced.

In the first Redcliff topped the list with a percentage of 91 the highest mark ever awarded in this competition. Camrose came second with 86% and Cardston third with 79%.

In the second, which is a competition for P. T. in the whole cadet corps, Lamont came first with 85%, Redcliff second with 83% and Camrose third with 80%.

In view of these marks Redcliff citizens have further reason for being proud of their principal and of their boys.

## Medallia Softballers Shut Out Red Caps

They Ran up a Big Score on Faulty Fielding

Although the score in the softball game here last evening, between the Medallia and the Red Caps, was very one-sided, the performance of the visiting team was a treat. They were the neatest, most accurate and wide-awake team that has played here this season, and their system should be a good lesson to all local players. While they completely shut out the Red Caps and scored 14 runs themselves, this is not an indication of the game from the standpoint of interest and entertainment.

At least ten of the 14 runs were made from wild throws and asleep-at-the-switch plays of the local lads. However, the Red Caps were considerably handicapped by the failure of some of their players to turn out for the game.

Miss Becker, of Calgary, who has been the guest of Mr. and Mrs. R. Simpson for the past fortnight, left for her home on Monday.

How is your Subscription?

## Arrangements Made To Open Swimming Pool

Pool Surroundings Are Already Greatly Improved

At a meeting held last Monday evening arrangements were made to get the swimming pool opened before the first of July. Mr. A. Peterson was engaged as caretaker with instructions to get the pool in shape for opening as soon as possible. During the past few weeks the grounds surrounding the pool have been greatly improved. Good substantial walks the full size of the space between the pool and the fence, have been laid and other improvements will be made to the dressing rooms.

Season tickets will be issued at once and much will depend on the sale of these tickets as to how long the pool will be kept open.

The following officers were elected for the season.  
President—Ed. L. Stone  
Vice Pres.—G. H. Allison  
Secy.—Thas.—B. S. Hodges  
Treas.—H. S. Hodges  
P. C.—A. E. Shaw, Dr. Ward.

## Former Redcliff Student Receives High Honors

Miss Marjorie Chadwick Graduates in Theology

At the recent convocation of the Anglican Theological College at the University of British Columbia, Miss Marjorie Chadwick, at one time a resident of Redcliff, but now of Vancouver received high honors. She is not only graduated with the diploma of Licentiate in Theology but she stood second in the class, and is the second woman in Canada to receive this diploma. Miss Hobbay of Vancouver being the first. She also won the Percy Job prize for the student ranking second in general proficiency in the third year and the Comely prize for the student ranking highest in practical Theology.

While taking her college course Miss Chadwick was able to attend lectures only half the time, as she conducted classes every morning among the Chinese children at the Good Shepherd Mission.

She also coached men of her own year, in Greek, at evening classes.

Miss Chadwick is to be heartily congratulated upon her splendid achievement in spite of so many handicaps and Redcliff citizens are proud that Marjorie was once a resident of this town and a pupil in our high school.

Miss Phyllis Sanderson returned to her home on Tuesday, after her illness in Medicine Hat hospital for the past month. She will not resume her nursing duties till next fall.

Departmental exams are in full swing at the school. The groups here and there on the streets are students discussing the papers just written upon. No doubt the ease of some of those professors who set the papers, will be burning.

## Fire Destroys Two Barns Last Sunday

Were on Property of R. N. Rose On Fifth Street

Two big barns completely destroyed and the roof and back of the fine brick residence on fifth street, owned by R. N. Rose badly damaged, was the result of a fire which broke out about four o'clock last Sunday morning.

The fire, which originated in the barn on the back of the lot, had gained great headway before it was discovered by Mrs. Hope and was past control before the fire brigade arrived. The rear of the residence had also caught and the brigade did good work in saving it but not before a considerable portion of the roof and kitchen had been badly damaged.

The origin of the fire is a mystery. Two solutions have been advanced. Either that some transients had gone to the barn for the night and started fire by lighting matches, or that the barn may have been struck by lightning as there were a number of vivid flashes during the night and early morning.

Mr. and Mrs. J. Hope and family, who occupied the residence, were able, with willing assistance, to get all household effects out of the building. These were replaced after the fire was extinguished and it was found the house was still tenable.

The loss is estimated at around \$1500. There was no insurance.

The annual Red Cross drive begins on Monday, June 22nd. It is hoped, in view of the importance of this work, that there will be a good response. The aid of the Red Cross is needed in all services, and it deserves the support of all who are interested in these things, especially in bringing health and happiness to sick and crippled children.

## Council Decided To Gravel Part Of Broadway

But Ratepayers Call Meeting For Further Discussion

A special meeting of the town council held last Friday evening for the purpose of considering a proposition for the grading and graveling Broadway, the proposition was submitted by Mr. Garner who offered to grade Broadway from the provincial highway at the town's eastern boundary and spread 400 loads of gravel on same as far as that amount of gravel would go, on the instructions of the town foreman. In return for this Mr. Garner was prepared to take, in payment, the old P. O. C. Rooming House building on Fourth street and \$1000 in cash. After carefully considering the proposition the council decided to accept it.

After the deal became generally known several ratepayers who were of the opinion that this work would be more advantageous to the town if done on Third street instead of on Broadway, circulated a petition requesting the council to reconsider the matter. As a result of this a second petition was circulated asking that a ratepayers' meeting be called to further discuss the question. The requisite number of signatures having been secured, the meeting was authorized. This meeting was held in the Town Hall on Tuesday evening next at seven o'clock.

Part management through an application of business principles, practical and theoretical knowledge and ordinary horse sense to farm problems is a necessity of this day of lowered prices. T. C. P. Herzer, manager Canada Cattle Raisers Association, told the Winnipeg Kiwanis at the Royal Winnipeg Hotel, recently. The Association has extended its activities in the west where it has 1344 farms of a total of 467,000 acres under supervision.

More than 200 scientists from 21 countries attended the fifth meeting of the Pacific Science Congress opened at the Empress Hotel, Victoria, June 1, and continuing at the Vancouver Hotel, Vancouver, until June 14. It was the first time the Congress has met on the American side of the Pacific Ocean. Lord Rutherford addressed the Congress from his home in England, his speech being carried by radio close on 8,000 miles to Vancouver.

## Local Soft Ball Girls Lose to Eaton Girls

Were Four Runs up in Their Half of Seventh

It was a hard game for the Redcliff girls to lose in their league game with the Eaton girls in Medicine Hat last Monday evening. With four runs up at their end of the seventh the local ladies met with reverses when the Eatonians came to bat for the last stanza. The latter took on a batting streak and were successful in getting five runs across the plate before being retired, leaving the score at the finish 8 to 7 in their favor.

The game was one of the best played this season and was well worth seeing.

The Cliff Dwellers play their next game here next Monday evening against Safeways.

## Gordon Memorial L.A. Holds Talent Social

The Financial Response Was Most Gratifying

A very pleasant and profitable afternoon was spent on Monday by those who patronized the Talent Social put on by the Ladies' Aid in Gordon Memorial school room. The first item on the program was a dry goods contest, won by Mrs. L. Shimmion, with the consolation going to Mrs. Gibson. The telling of how the talent money was earned drew out some original compositions in song and story. Particular mention may be made those by Mrs. Moreton, Mrs. L. Shimmion, Mrs. Shimmion, Mrs. W. Smith and Mrs. C. T. Hall. After a dainty lunch served, the afternoon was brought to a close with several items by members of the Aid.

The financial response was most gratifying.

## E. T. Cooke's Store Nicely Renovated

The Color Scheme Adopted is Most Attractive

Have you seen E. T. Cooke's grocery store lately? If not make a special trip to see it. It is worth it.

Mr. Cooke has redecorated it throughout with a color scheme of white with green trim. The chain stores have now nothing on this store for artistic decoration of premises or attractive arrangement of goods.

Furthermore the entire work of making fixtures for showing goods and of decoration has been designed by Mr. Cooke himself and reflects great credit upon his ability as a cabinet maker and interior decorator.

Mr. Cooke has always kept a clean attractive store but it is now better than ever. So come for yourself.

Harold Congram met with a painful accident last Tuesday evening. While playing leap frog he fell and broke his wrist.

He was taken to the Medicine Hat hospital where an x-ray was taken and the bone set. Fortunately it was the left wrist that was injured, so Harold will be able to write his exams next week.

## Memorial Park Work is Now Well Under Way

The Plans Have been Approved By The Committee

Work on the War Memorial Park has commenced this week and it is hoped that by the time this appears in print the lot will have been plowed and surveyed. Plans for the memorial have been approved by the memorial committee and the services of an artist are being obtained to make a drawing of the proposed layout, so that the citizens will be able to judge beforehand what the memorial will look like when completed. The artist's sketch will be framed and displayed in the Post Office as soon as it is received.

Subscriptions are coming in slowly and donations for this worthy cause will gladly be received by Mr. H. J. Cox, Secretary-Treasurer.

## Boy Scouts To Sell Flags For July 1st

They Are Preparing For Campaign at Elkwater Lake

Small flags for button holes, house or car decoration on Dominion Day will be sold on June 29th, by Boy Scouts who are cranking to make a house to house canvass. These flags are very cheap and it is hoped that the citizens will avail themselves of the double opportunity of decorating themselves, their homes or their cars in a manner appropriate to the occasion, and at the same time helping the Scout movement who will benefit from the profit on the sale of the flags. If there are any citizens or organizations who wish at this time to purchase a large Union Jack for use on a flag pole, prices for these can be obtained from Mr. Leonard Hicks or Rev. P. Malcolm Stewart, and if orders are placed immediately the flags can be procured in time for July 1st.

Preparations are under way for the establishment of a Scout camp at Elkwater, and it is expected that some twenty or thirty boys will attend this camp some time early in June.

The boys will be under competent supervision and will have the benefit of associating with other Troops who will be under canvas at the same time. The boys are making splendid progress and it is expected that they will all have passed their Tenderfoot tests before going to camp. Mr. Dan Jensen has been appointed Assistant Scoutmaster by the local Group Committee, and the Rev. P. Malcolm Stewart has been appointed Assistant District Commissioner of the Medicine Hat District and becomes a member of the District Association Executive.

Mrs. Jno. Kitchen was the hostess on Wednesday at a very enjoyable miscellaneous dinner in honor of Mrs. Frank Bodner, a recent June bride.

The gifts which were numerous and useful were presented in a prettily decorated wagon drawn into the room by little Lorraine Hope and Johnnie Kitchen.

### RIVERS ARE DANGEROUS

Warnings regarding the danger of swimming in our rivers this season, are coming from all parts of the province. The numerous freshets in the mountain streams have raised the main rivers to such an extent that in many cases the main channels have shifted, as a result of which sections which were shallow previously are now the deepest and most dangerous parts of the rivers. The danger of this has been multiplied by the muddy condition of the water. For these reasons those who are in the habit of going to the river for boating or swimming should exercise great care in the selection of their ground for either purpose. Already several drowning accidents have been reported from different parts of the province.

### REASON TOGETHER

The fact that sixty-eight nations of the world are now gathered together at London for the purpose of attempting to devise ways and means of improving conditions in their respective countries, should serve as a reminder to the people of all nations that there is not a single country which has been suffering from the depression of the past few years.

Those who have developed the habit of blaming their own respective governments for existing conditions in their own countries will now see—if they are broadminded enough—that all governments were in the same position, and that the only solution to the many problems was the concerted action of all the countries concerned.

Since these conditions are world wide and since all individual governments were powerless to act alone, the only alternative way for all to get together to air their grievances and offer suggestions for their improvement. This is now being done at London and the hope of the world lies in the success of this conference.

In the mean time the common people of the countries represented at the London conference should exercise greatest care in seeing that no stunting block is placed in the way of the chosen representatives. For the moment party politics, spites, hatreds and animosities should be forgotten and all questions should be approached with tolerance and forbearance and with an eye single to the welfare of the world at large. True, sacrifices and changes of ideas will be necessary but such things have been done before with the same objects in view.

Local suggestions for the remedying of local conditions have been suggested. Among these are inflations, cancellations of debts, public ownership of land and abolition of profits. Some of the sixty-eight countries represented at the conference have tried all of these things and are still no further ahead than those countries

which have not tried them, but which still have those who are advocating them. Wherein then lies the solution? In a word it may be found in the Biblical injunction: "Come, let us reason together."

### JUST FOR FUN

The following is the only known example of a limerick written in blank verse. There was an old man of St. Bees,  
Who was stung in the arm by a wasp,  
When asked, "Does it hurt?"  
He replied, "No, it doesn't."  
I'm so glad it wasn't a hornet!"  
W. S. Gilbert

In bridge, a good deal depends on a good deal.

Money may be all right, but you sho' kin waste a powerful lot of time makin' it. (Negro tramp in the motion picture, Hallelujah I'm a Bum.

Diamonds are chunks of coal that stuck to their job.

Ralph Waldo Emerson, offered a cherry in the middle of the morning, looked at it cynically. "why," he enquired, "should I start up all this highly complicated machinery of digestion, just for a single cherry."

Then there's the man who had to stop drinking because of the wife and kidneys.

### Redcliff Reminiscences

Taken From Our File of June 26, 1914

Born-Moran, in Redcliff, Friday June 19, 1914, to Mr. and Mrs. Wm. Moran, a son.

At a farewell supper held on Saturday night by the Scouts in honor of their leader Mr. Collins, who has resigned, Patrol leader Fairbairn read an address in which the boys thanked Mr. Collins for his services. He also presented the retiring scout master with a gold pin set with pearls.

Mr. and Mrs. Ed L. Stone spent Sunday and Monday in Medicine Hat, assisting in the

musical programme in connection with the opening of Westminster church.

Redcliff cigars are selling for 2 for 25c and are considered by smokers the best on the market.

The Lockwood block on Broad way is nearing completion. Mr. Aultman expects to move in next week.

The report of the Public Works committee of the council recommending that fifty gas standards at \$35 each be purchased and installed, was adopted at Monday's meeting.

### DULL HEADACHES GONE

## Rescue By Radio

**Blinking Of The Steamer "Bevermore"**  
Gradually Desperately  
It was on the night of the 21st of last month, I was a passenger on board the "Demop" (Hottelard Lloyd) crossing the Bay of Huxley on our way from Tangier to Southampton.

The weather was glorious, the sea as smooth as oil and flooded with moonlight.

"At about a quarter to eleven we were dancing in the saloon when my partner (an ex-natal man) and I, dined together."

"Hello, what's up?" (Overup EA H)  
"Hello, what's up?" he said. "We've altered our course." I, of course, had noticed nothing, but on his suggestion I went to my cabin, got a cloak and went up on deck with him. One look at the stars was sufficient for him. "We're going back," he said. "So I found a ship's officer, who, knowing him, was willing to give assistance."

We had received an S.O.S. A ship about thirty miles back and we were returning full speed to her assistance. It was a three-thousand-ton Latvian steamer, the "Bevermore," whose boiler had exploded.

In what seemed a very short time our searchlight picked up the wreck. Her decks were already awash. The crew were all safely in their boats we learned.

"I'm sorry," the "Bevermore" sank, and our passengers, many of them rescued from their sleep by the stopping of our engine, and in various states of undress—stood and watched her go. The silence was amazing—everything on board had been done in what seemed almost no time—no shouting—no orders to be heard.

For over three hours we watched the last, her boiler dipping and, quietly, quietly she sank, hardly, it seemed, displacing the water round her.

The wrecked crew climbed the rope ladder into the safety of the "Demop." Three women first, then twenty-four men, one by one, carrying their belongings. The first we thought to be a baby—but it was only the ship's cat. Last of all the captain of the "Bevermore" white-faced, with his papers wrapped in oilskin, held between his teeth as he clambered up.

I think he felt as though we had been watching "by a human hand"—Elizabeth Paget, in Everyman, May 6.

## Time Well Invested

**Motorists Learn Nothing When Stopping For Children At Play**

It can at once be admitted that children are careless, very careless. The pursuit of a ball which rolls into the road is to the child more important than anything else. The idea of danger being there does not register in the mind of the child. That is why a human quantity and drivers of cars are aware of it. If they are careful they will cut down on the car on the streets where there are children; they will even move along at a snail's pace, but by so doing they will save with a human takes them an extra three or four minutes to reach their destination, but what of it? It is time well invested.

## Depression Was Needed

The public debt of Canada, of the nine provinces and of municipalities and corporations amounts to \$8,885,594,900, with an annual interest charge of \$418,685,000. Counting the pace we were travelling it would almost seem to have been a blessing that the depression did come.—Ottawa Journal.

## Reliable Authority

"About the greatest man who ever lived in this generation was Skinner—broad-minded, big-hearted, and brilliant—and yet he died with all his talents unexpended."

"How did you come to find out about it?"  
"I married his widow."

## Man-Made Lightning

Man-made lightning of 3,000,000 volts blasted an 18 foot 4 x 4 timber of redwood in a spectacular demonstration at Stanford University recently.

**Hotel Guest**—"Do you know if the charges here are reduced if one stays by the week?"  
Hotel Porter—"Couldn't tell you, sir. Nobody ever stayed a week!"

Parking on one side of city streets is to be permitted in Belfast, Ireland.

W. N. U. 1997

## Punishment Was Heavy

**Counterfeiters of Hundred Years Ago**

Modern counterfeiters might be a bit chary about passing their spurious product were they subject to the punishment meted out to offenders in Nova Scotia a century ago. In those days of the 19th century, the loss of one's ears was considered a heavy penalty for the person detected passing counterfeit money.

The earliest recorded arrest at circulation of the counterfeit money took place in Nova Scotia in 1823, when a large amount of £1 and £2 English shillings were discovered in Halifax and several other provincial centres.

Investigation soon resulted in the arrest of one of the counterfeiters, in whose Halifax house were found scores of banknotes obviously forged. The £1 bill resembled the originals so closely as to defy detection, but those of the larger denominations showed clumsy workmanship. It was these that had aroused suspicion, leading to the arrest of the Halifax man.

He was quickly convicted and it was ordered that one ear should be cut off while he stood in a public place. Sentence of one year in jail also was imposed.

## Using Canadian System

**New Jersey Sponsors Traction For Identification Of Poultry**

A poultry system already used in special breeds of poultry in Canada is being sponsored for general use in New Jersey by the state police. Poultry raisers will be urged to purchase tagging equipment and search their registration numbers on the under side of the left wing of the bird with a special form of instrument which has been dubbed with trademarking.

Colonel Norman Schwartzkopf, superintendent of state police, explained the tagging would aid in return to owners of chickens found in distant parts of the state, in checking the sale of birds to markets in New York and Philadelphia and in rapid identification when birds were found under suspicious circumstances.

## Prevented Train Wreck

**People Vorned In Wheel Sounds**

Mr. and Mrs. Henry Brumser prevented a train wreck at Water Valley, Minnesota, because they were trained by 20 years of listening to the "music" of Illinois Central trains which pass their home.

Receivers, Train No. 24, fast straw-berry express passed over a defective rail, creating an "off-key music" which the difference in the sound of the wheels rolling on the rails, the couple went to the track and found a split rail, which miraculously had remained in place as the train sped by.

They stayed on the spot until the second section of the train appeared in the distance, then flagged it until it came to a stop. Railroad officials said their action prevented a disastrous wreck.

## Making It Clear

In drawing a regulation making it compulsory for owners of dogs to put chains on a dog while out walking, the parish council of a small German town near Berlin drafted the following: "He who owns a dog and is seen running about the streets without a lead will be shot." When a member objected to the wording the regulation was re-drafted, and now reads: "He who owns a dog and is seen running about the streets without a lead will be shot—the dog."

The stone below the cottage of Dr. Alexander Irvine, in Anstruther, Fife, which was used by the famous author's father, a cobbler, to beat leather, is to be preserved as a national relic.

Mrs.—"How do you know that woman is cruel to her husband. You didn't even glance at her?"  
Mr.—"Didn't have to—I glanced at him."

"I think this scenery is just too beautiful."

"Um, I don't know. Take away the mountains and the lake and it's just like anywhere else."

"Don't worry any more about him, dear. There are plenty more fish in the sea."

"I know," said the jilted one, "but he was a goldfish."

Mexico's plan of extending credit to farmers is declared to be a success.

For more than 10 years Rutland County in England has had no civil or criminal cases.

## The Temperate Man

**Is One Who Does Everything Strictly In Moderation**

The virtue of temperance doesn't consist in doing without. It consists in moderation. And it isn't limited to the use of alcoholic beverages.

The temperate man is a guy who does all things in moderation.

He drinks, if he so desires, but he doesn't get drunk.

He enjoys food without being a glutton, or limits his diet without risking his health to please his vanity.

He believes in himself and respects himself without assuming that he is made of sterner stuff than other men.

He respects other men without being servile.

He feels a friendly interest in others without meddling in their affairs.

He works when he must without thinking leisure as evil, or enjoys his leisure without scorning those who work.

He scorns the things that are vile and degrading without being a self-righteous prude.

He stands up for his convictions without being an opinionated ass.

He professes and practices the religion of his choice without becoming a fanatic and a nuisance to others.

He feels a decent patriotism without being blind to his country's faults or the virtues of other lands.

He expresses a natural preference for the region of his birth without asserting that the people of other sections are imbeciles or rogues.

He supports a political candidate or cause of his choice without assuming that all who disagree with him lack sense and honor.

He makes all the money he can without losing his sense of values and sacrificing everything to get money.

He is thrifty without being a miser and generous without being a waste.

He is kind and generous to his family without being a self-made martyr.

He is an over-indulgent Santa Claus. He prides when praise is due without descending to the level of a yes-man, and criticizes without being a scold.

He demands his due of respect without continually watching for something to be offered him.

In short, he does all things that nature and reason prompt him to do, but imposes upon himself the restraints required by good taste and the rules of civilization.

And if he doesn't do these things, he isn't a temperate man, though he fails his days without knowing the taste of alcohol.

## Speed and Beauty

**Watchwords Of A New Era In Railroad Building**

Speed and beauty will be the watchwords of a new era in railroad building if an experiment just announced by the Union Pacific System proves successful. W. A. Harriman, chairman of the Union Pacific system, stated in New York that by authorization of the executive committee he order would immediately be placed for the construction of an entirely new type of passenger train, featuring a speed of 30 miles per hour light weight and full streamlining.

## Overcome His Handicap

A youth who never heard a lecture nor took part in a class discussion will be awarded a certificate in architecture by the University of Cincinnati. Hilbert G. Dunning, 32, a deaf mute since birth, won the certificate in three years of evening study.

Costs of maintaining the British Royal Air Force are estimated at nearly \$200,000 a day.

## Keep Mentally Active

**It Helps to Busy Nervous System**

Mental exercise is prescribed as a cure for the fears of depression by Dr. Charles H. Dollfus, superintendent of the New Hampshire State Hospital.

Keep mentally active, he urges and adds that "mental disease is nervous exhaustion rarely, if ever, come from over-use of the brain." If you haven't work enough to keep you mentally occupied, adopt a hobby, whether it be collecting stamps, studying stars, planting a garden, or mastering contract bridge.

Costs of maintaining the British Royal Air Force are estimated at nearly \$200,000 a day.

## Honey Production

**Manitoba Shows Second in Amount Of Honey Produced By Provinces**

The total production of honey in Canada in 1937 was 30,625,634 pounds valued at \$1,613,175. The province of Ontario was the leading producer with 10,000,000 pounds, followed by Manitoba with 5,886,288 pounds; Quebec with 2,601,900; British Columbia with 1,007,000; Alberta with 500,000; Saskatchewan with 420,149; Nova Scotia with 57,807; New Brunswick with 14,000; Prince Edward Island with 13,000.

In 1932 Canada exported 2,398,250 pounds of honey to the value of \$193,013. The United Kingdom and Norway were the largest buyers of Canadian honey. Canada last year imported only 21,134 pounds valued at \$1,012. These imports came principally from Jamaica and the United States.

## Died Sixty Years Ago

**David Livingstone Was One Of The Greatest Missionaries Of All Time**

David Livingstone, the great African missionary and explorer, was born March 18, 1813, at Balmain, Scotland, was ordained a missionary December 20, 1840, and embarked on the ship "George" on December 8 and proceeded to the Cape and thence to Algoa Bay. He died May 1, 1873, he was buried one of the greatest missionaries of all time. He found the slave trade the most powerful and most deadly agent that could possibly operate against the spread of Christianity. From that time he set his face steadily against what he termed "the open sin of the world."

## The Least Popular Meat

**Canadian People Are Not Very Fond Of Mutton**

Mutton is perhaps the least popular of all the meats sold in the butcher shops in Canada. In the settlement days the mutton was good for making candles, and for greasing the old horse owners of threatening animals. The mutton of the New World is more repulsive to the taste of the modern man, but the Indians and early settlers counted the fat ribs of the sheep deer as the most delicate of the carcass, sheep raising on the farm is now practically a thing of the past, for Canadian wool is practically valueless.

## Live Animals For Advertising

**Some Shops In Paris Have Adopted Unique Method**

Live advertising comes by way of the little animals to be seen glancing in one of the windows of a tailor's shop, along the Grande Boulevard. Wool from their backs, the placard explains, will one day go to the making of suits of the kind displayed in another window.

Two leopards are also installed in a case in a Parisian furrier's window. If such methods become popular the streets of the capital will soon resemble a faraway place.

## Will Honor Photographer

**Chalon-sur-Saone, France, Will Hold A Contest To Honor the Man Who Took the Best Picture in Honor of Nicéphore Niepce, the "Father of Photography," who was born in Chalon and died in 1823.**

The President of France and the Government have promised to support the events.

## Navy For Sale

A navy is for sale. Panama wants to get rid of its only "baby of war," a steam yacht manned by two caretakers. Ecuador is another state with a one-vested navy; Mexico has five naval vessels, and Peru fourteen, including six submarines.

## Nearly 250 New Metal-working Plants

Nearly 250 new metal-working plants have been opened in Osaka, Japan, last year.

Barber (to young plastered-haired shoemaker): "What'll you have, a half cut or just oil changed?"

A naturalist in Europe claims to have found a bird "who lies in bed all day."

Advancing sugar prices have brought optimism to nearly everyone in Cuba.

More than half the rubber exported from Siam last year was sent to the United States.

More hotels for hikers are being opened in Scotland.

Peru has banned the export of gold.

Tinidad has banned coin gambling machines.

## The Promise Of Springtime

**Brings Hope Anx To A Discouraged World**

It is not for nothing that normal man has always loved the springtime and the season of growth. We may make our jokes about the spring poet and his raptures as we walk in the snow, but the longing for a language to feel the stirring of satisfaction at the sight of the over-turned earth in the springtime, fresh and fragrant, still holds a hold but distinctive aroma of the good earth yearning to be sown that it may in its season bring forth the fruits that man needs for his sustenance and delight. The sight of early growth, the sprouting grain and the great of garden and lawn and budding trees, brings hope anew even in times when hope has and its struggle to be restricted in the hearts of men.

The recent rains—so welcome in regions that have suffered drought in seasons past—have renewed and renewed the earth, have quickened a better feeling and given encouragement to farmers who badly require the promise of a good harvest. All sections of the community in recent years have been given a sharp reminder of the value of the primitive communities, whether of large or smaller size, depend upon the forces of Nature and the work of the primitive people to live and to enjoy a reasonable measure of comfort.

It is well that that lesson may never be forgotten when brighter days dawn and all other sections of the community will desire, not merely in the hope of a better future on the land, the worker with Mother Earth, shall receive once again his full share of the comfort and reward of the life of the land, to receive in a civilized world. —Regina Leontop.

## Doctor Describes How Extra Energy Originates

**"Choking" Of An Automobile Is**

Extra energy you receive momentarily in emergencies comes from the quick chemical breakdown of accumulated starch in the muscles, according to Dr. Jacob Backs of the Department of Pharmacology of the University of Michigan.

## Addressing The American Physiological Society, at Cincinnati, Ohio

Dr. Backs said that the "choking" of an automobile is similar to the "choking" of a man in a panic. In the case of the automobile it is the case of the human body—buckled down to their job.

Normally, the muscles do their work by burning lactic acid with the oxygen in the blood stream, he said. That occasionally the body must "move" without starch is a story of the past, requiring energy faster than oxygen can be carried to the muscles tissues in these emergencies, he said.

The "choking" of an automobile is stored in the muscles, undergoes two quick chemical breakdowns.

One gives lactic acid in large amounts. Another gives lactic acid, a glycogen and phosphorus compound, he said. Energy sufficient for short bursts of activity is the by-product of both processes. But, if the extra stress keeps up, the heart has time to increase its rate of beating and to pump more oxygen-charged blood to the muscles as they can keep up with the work imposed on them.

## This Complex Life

The complexity of life in these strange days was impressed on us the other afternoon when a saunterer and two gentlemen who were standing on a Fifth Avenue corner, talking. One of them, as we passed, said to the other, with a frown, "What business was it that you're in for any longer?"—The New Yorker.

This would most assuredly be a black and uninteresting world without the scientist. One of 'em has discovered after painstaking researches, that a frog is not ticklish from the start of time.

Nearly 6,000 women doctors are now practicing in the United Kingdom.

The savage desert tribes of Africa pay no taxes. It is a mystery therefore what makes them so savage.

Thirteen of Britain's diplomatic representatives in other countries are broke.

## FANCFUL FABLES

◆ FANCFUL FABLES ◆

Nearly 250 new metal-working plants have been opened in Osaka, Japan, last year.

Barber (to young plastered-haired shoemaker): "What'll you have, a half cut or just oil changed?"

A naturalist in Europe claims to have found a bird "who lies in bed all day."

Peru has banned the export of gold.

Tinidad has banned coin gambling machines.

Thirteen of Britain's diplomatic representatives in other countries are broke.

WORLD HAPPENINGS  
BRIEFLY TOLD

The Bank of England recently bought £333,200 in hat gold.

Flying time of the London-Cape Town air mail has been cut from 11 to 10 days for the 5,000-mile trip.

Proclamation has been issued by the Dominion Government extending the Canada-New Zealand trade agreement for six months from May 31.

Forty-three cases of material for the national exhibit of the kingdom of Siam at the forthcoming World's Grain Show, has reached Regina.

The Manitoba Government is richer by \$2,045, which was realized in the auction of hay cutting privileges on crown lands of the Red River delta north of Selkirk.

Allan C. Frazer, of Calgary, has taken over his new duties in Ottawa as managing secretary of the National Dairy Council of Canada. Mr. Frazer succeeds W. F. Stephens.

The Germans broke all records for air mail from Europe when the Graf Zeppelin's mail was delivered at Buenos Aires four and one-half days after it had left Friedrichshafen, Germany.

After an absence of three years, liquor advertising is to be permitted in the Manitoba. The Manitoba government liquor control commission has rescinded the order banning liquor advertisement, it was announced.

Indian outside to decide to set nets for commercial fishing in the Churchill waters this summer, no catches will be made this year, according to fishermen at The Fur Man.

Any German desiring to visit Australia must pay 1,000 marks (\$170) for a visa hereafter. This is a retaliation by the Hitler Government for restrictive measures against Nazis in Australia.

## A Simple Resuscitator

Double Can Device Rescues Patient and Restores Breathing

A simple resuscitator which creates respiration in newly born babies and restores breathing in adults, is the simple process of rocking the patient in a double can device has been developed at the Shreveport Chastity Hospital in Arcadia, Louisiana.

The front end of the double can has a hole and rubber collar to allow the patient's head to protrude. The inner cylinder is an air chamber while the area between the inner and outer can is partly filled with warm water.

The upper side of the inner can has a hole that allows passage of air which is increased or decreased by pressure of the water on the can.

As explained, the air compressed in the air chamber as the can is rocked upward and the opposite motion causes a partial vacuum, thus changing of the air pressure has the same effect upon the chest, as hand pressure system used by swimming resort life preservers.

Additional advantages were that the water warms and moistens the air and the blood circulation is stimulated by the rocking.

## Cannot Lower Banner

Religious Sign in Calcutta Paid Well For Protection of Principles

So that their banner might never be lowered, in accordance with their principles, a religious sign known as the Jalni, paid followers and street car officials of Calcutta, India, \$2,500 to cut off the overhead wires during the recent procession of the faithful. The banner is 60 feet high and always heads their procession, and must never be dipped at any time or any place. The sect traces its religion back to 600 B.C. It has no temples in out-of-the-way mountain spots. The one in Calcutta is famous for its many mirrors.

## MILIONS For Relief

For all Canada during the past two-and-a-half years the Dominion Government has expended directly and indirectly \$115,000,000 to relieve unemployment and for direct relief.

The figures, compiled semi-officially include advances to provinces that were unable to meet their share of costs. For the current year the relief legislation limit ceiling is \$20,000,000.

## Might Use Rubber Map

The home service department of a large electrical concern received this note from a woman customer: "I have a pet dog which barks on chewing the electric lamp cords. If he ever bites through a cord and any of the juice leaks out, will I get a shock if I mop it up?"

W. N. U. 1997

## Dargins in European Tours

Cheap Rates Making It Possible For Many Canadians To Make First Trip To Old Country

(By E. L. Chisnold)

A great many Canadians who all their lives have thought and talked vaguely of going to Europe some time will have year by year relegated this expectation to an indefinite future, are this summer realizing their ambitions. This is the conclusion at which one arrives after attending early departure of Canadian liners from Montreal and analyzing the bookings of those who will sail down the St. Lawrence on their way to Europe in the course of the present summer for the first time.

Despite the continuance of unsettled economic conditions, reduced incomes, and restricted luxury purchasing, the realization has come home forcibly to many people that this is the year to make that European trip. It is not too late to do it at such low cost. And so those appreciating the opportunity and able to do so are taking it.

Imagine being able to bid for a free fare to Europe for as little as \$250.00! Thirty-one delightful summer days of tranquil sailing between the romantic, village-dotted shores of the St. Lawrence River, of comfortable ocean travel, and of the most interesting of touring in commodious motor coaches through the choicest scenery of England, Belgium, Holland and France at \$60.00 a head.

A unique feature of the arranged tour, in addition to its economy, is the amount of comfort, rest, and visiting that can be crammed into the limited time. In the space of the month at his disposal, the trans-Atlantic traveller can see so much of the continent, and travel virtually all those romantic and historic spots which he has long dreamed, which he would probably like if he were making a trip on his own.

It is no easily made and at a remarkable saving.

Style No. 716 is designed in size 2, 4 and 6 years.

Size 4 requires 2 1/2 yards 35-inch with 1/4 yard 35-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## Recipe For This Week

(By Betty Bincer)

IRISH GUINNESS CAKE

- 1/2 cup shortening.
- 1/2 cup sugar.
- 1 egg.
- 1/2 cup flour.
- 1/2 cup bran.
- 1 teaspoon soda.
- 2 teaspoon ginger.
- 1/2 cup sour milk.
- 1/2 cup molasses.
- 1/2 teaspoon salt.

Cream shortening and sugar together. Add the egg; beat well. Add the bran. Mix and sift the dry ingredients and add them to the first mixture, alternately with the sour milk and molasses. Pour into greased pan and bake in a moderate oven (375 degrees Fahrenheit) from 30 to 40 minutes.

## ORANGE FIG PRESERVE

- 1 package fig powder for orange
- 1 pint milk.
- 4 fig newtons.

First break fig newtons into small pieces, and place in the bottom of the dessert dish. Then dissolve powder for orange junket in lukewarm milk, and pour immediately over the newtons. Do not disturb until firm about 10 minutes. Chill in refrigerator.

## Not a Bad Comparison

A father and his little boy were having a discussion on legal matters. The father was asking the boy, "What is a retaining fee?"

The boy replied: "A retaining fee is a fee paid to a lawyer before he will undertake to do any work for a client."

"Oh!" replied the little boy, "I'm putting a shilling in a meter before you get any gas."

A woman in Germany is earning a living by talking to lonely passengers.

## Razor Blades FREE with POKER HANDS!

You can get these five keen, well-honed safety razor blades (fit any Gillette-type razor). Given free for just one complete set of *Turkey Poker Hands*... any man would appreciate such a gift!

Mild, yet sweet and full of flavour—Turret Fine Cut is a particular favourite with those who "roll their own."

A 20 pack package of this mild Virginia tobacco will make at least 50 cigarettes... in it are combined satisfaction and genuine economy.

It pays to "Roll Your Own" with

TURRET FINE CUT CIGARETTE TOBACCO

Radio Commission Acquires Powerful Station At Toronto

With the acquisition on lease from Gooderham and Worts, Limited, of broadcasting station CKGW in Toronto, the Canadian radio broadcasting commission has virtually completed arrangements for inaugurating a regular daily broadcasting service of a national character for radio listeners throughout Canada. The announcement was made by the commission recently. At the outset, this service will extend over a period of at least three hours during the best broadcasting part of the day.

The commission has leased station CKGW for a term of years and will operate it under commission management, the announcement stated.

The commission is placing Charles Shearer, well known Toronto radio manager, in charge of this station as manager.

Broadcasting stations at Montreal, Ottawa, Toronto and Vancouver will now be operated by the commission, the announcement continued.

To ensure the regular distribution of national broadcasting service from other stations from coast to coast, the commission has purchased broadcasting time from principal stations throughout Canada for the program.

It has at the same time leased trans-Canada transmission wires for carrying its programmes from the place of origin to the broadcasting stations in all the principal cities.

The commission is now engaged in planning for and creating Canadian programmes of a distinctive character. These programmes will be carried in the various centres of Canada.

The name of the Toronto station will be changed to CKCT, the letters "C" for Canada and "T" for Toronto, in recognition of the commission's station in Toronto.

Women Athletes Will Enter Empire Games In 1934

The biggest gathering of women athletes ever known is to take place in London, England, in 1934. Events for women are to be included in the British Empire games, which take place in August next year, and representatives of every part of the empire will attend.

The women's world games are being held in London in the same month, and it is hoped that most of the British athletes will stay for the international gatherings. Mrs. Muriel A. Cornell, secretary of the women's amateur athletic association, said recently: "We expect that from 25 to 25,000 will attend women to the world games. Each will send a dozen representatives and more if women are dropping."

Actor—"Yes, my friend, usually my audiences are glad to see me."

Friend—"What a quaint way of keeping them there!"

It is foolish to cultivate the cultivation of fruit-picking by giving your friends an occasional dig.

Air insurance rates in Europe are dropping.

Demand for homes in Sydney, Australia, is greater than the supply.

## Interesting Feature To Be Shown At World's Grain Show

A feature of the exhibit which the Saskatchewan Wheat Pool is preparing for the World's Grain Show, to be held at Regina in July and August, is a full working model of a modern terminal elevator. This is an attractive miniature of Pool Terminal No. 4 at Port Arthur, which has a total capacity of over 6,500,000 bushels of grain.

The model, painted ivory, consists of workhouse and storage annexes, boiler house, track shed and railway track. In addition there will be a model boat—a typical Great Lakes grain carrier—alongside the dock, loading up from the shipping spout, thereby lending an additional touch of realism to the picture.

The exhibit is an excellent opportunity to learn just what happens to Western Canada's wheat when it enters one of these big terminal elevators, for by means of an electrically driven motor the main handling process may be followed with ease.

Some of the scale size annexes are shown in section to indicate their construction, while a good view may also be obtained of the horizontal and vertical grain conveyors in section. The conveyors are accurately reproduced even to the numerous Canada's transmission wires for carrying its programmes from the place of origin to the broadcasting stations in all the principal cities.

The commission is now engaged in planning for and creating Canadian programmes of a distinctive character. These programmes will be carried in the various centres of Canada.

The name of the Toronto station will be changed to CKCT, the letters "C" for Canada and "T" for Toronto, in recognition of the commission's station in Toronto.

The commission is placing Charles Shearer, well known Toronto radio manager, in charge of this station as manager.

Broadcasting stations at Montreal, Ottawa, Toronto and Vancouver will now be operated by the commission, the announcement continued.

To ensure the regular distribution of national broadcasting service from other stations from coast to coast, the commission has purchased broadcasting time from principal stations throughout Canada for the program.

It has at the same time leased trans-Canada transmission wires for carrying its programmes from the place of origin to the broadcasting stations in all the principal cities.

The commission is now engaged in planning for and creating Canadian programmes of a distinctive character. These programmes will be carried in the various centres of Canada.

The name of the Toronto station will be changed to CKCT, the letters "C" for Canada and "T" for Toronto, in recognition of the commission's station in Toronto.

CHAPTER XI.—Continued.

"Good Lord! And you've deserted, too, Ped?"

"But I couldn't miss out on a trick like this, could I?"

Alan winced. Here was Pedneault mixed up in his trouble. Like an eager wolfhound when his master has left behind, Ped had chewed his collar and come along on the hunt.

"Where's Bill and Joyce?" Pedneault's face grew long, his eager excitement sobered down. He decided it was better to say nothing just about Dave's suicide. Alan had enough anxiety pressing on him.

"I'm thankful for that gasoline," Alan said, "and for you throwing in with us, Ped, at the price you'll pay. But I don't see how you can help. We can't carry a third person on this trip. I'll have to have room to work the machine gun."

"Then I'll go in the launch," Alan said. "You can make it. Above the Alouka there's twenty miles of low water. That's what you can get through."

"I can make it now. I know what the launch can do. After all these heavy rains, draining down that left fork from the Tah-Asah... Look there!" he pointed at the water stage on a pier—"that's eighteen inches higher than when we made our first point about here. I can get through; and once I'm in those deep water channels of the Tah-Asah—"

"All right," Alan agreed. "You'll be a mighty big help, if you put out of it, you'll be in position to carry on with them. Let's go up to the post and make our arrangements. You'll be leaving about five."

Meeting Bill in the trading hall, he introduced Pedneault and explained. They went on back to the kitchen and worked out their plans. Pedneault was to leave at dawn in the launch. Then the plane was to leave at ten o'clock. Pedneault just inside the Tah-Asah, the plane would fly ahead, locate the bandits and bring them to bay. The two craft would thus close in together for the battle.

There was but one hitch in the plan. All three men were aware of it, but no one mentioned it. These details had Joyce with them; they could and would use her for protection. How could they be swept with a machine gun's deadly spray when she was with them?

It was something which had to be left to luck or fate.

Alan gave final instructions: "If anything happens to the plane, don't try to fight those five men by yourself. Pedneault, bring wide of them, go on east to that big lake I mapped for you, and join Bill there. Then the two of you fight them to a finish."

"All right," Alan agreed. "You'll be a mighty big help, if you put out of it, you'll be in position to carry on with them. Let's go up to the post and make our arrangements. You'll be leaving about five."

Meeting Bill in the trading hall, he introduced Pedneault and explained. They went on back to the kitchen and worked out their plans. Pedneault was to leave at dawn in the launch. Then the plane was to leave at ten o'clock. Pedneault just inside the Tah-Asah, the plane would fly ahead, locate the bandits and bring them to bay. The two craft would thus close in together for the battle.

There was but one hitch in the plan. All three men were aware of it, but no one mentioned it. These details had Joyce with them; they could and would use her for protection. How could they be swept with a machine gun's deadly spray when she was with them?

It was something which had to be left to luck or fate.

Alan gave final instructions: "If anything happens to the plane, don't try to fight those five men by yourself. Pedneault, bring wide of them, go on east to that big lake I mapped for you, and join Bill there. Then the two of you fight them to a finish."

"One other thing. I don't want Buzzard or myself to be charged with murder. You're in service, Pedneault; you'll not only be on a legitimate patrol, but you have the power to deputize. As a special constable, I'd better put that down in black ink white."

It seemed strange to Pedneault, who had sworn in half-breeds and Indian scouts and dog-team drivers on emergency occasions, to be swearing in his former officer commanding in so lowly a capacity. He wrote out the formal authorization: James A. Pedneault, status, constable (temporary); capacity, aviator. Alan McClellan Baker; status, special constable (temporary); capacity, scout and machine gunner.

At the earliest hint of dawn they went down to the landing, inspected the launch and issued Joyce's flight case on the stern half-deck. Pedneault shook hands with them, slipped into the wheel seat, and set out alone, a solitary figure, up the Big Alouka.

Waiting, nervous and jumpy, as both had waited for zero hours in France, Alan and Buzzard waited for the unutterably lonely post.

At nine o'clock, drawn down to the landing, they went over the plane for the third time, and Alan mounted the machine gun in the cockpit. When the zero hour came, he towed the craft out into midair, held there while Buzzard warmed the spitting motor, and then sending the canoe spinning with a kick, he spun, began his west.

Buzzard lifted the plane out of the river, climbed five thousand feet, and headed into the northwest.

CHAPTER XIII.

The Swan Nest

Thirty miles above the Alouka forks, they caught up with Pedneault. While that all was going well with him, Alan turned his glasses ahead again, sweeping the deep waterways within vision. He picked up two tiny black objects creeping up a broad blue channel ten miles on into the Tah-Asah.

Signaling Pedneault that they had sighted the canoes, Buzzard slowed down to stalling speed. Pedneault answered back that he understood and was ready to launch the launch into a long narrow V-shape of white froth stretched behind it. Then, waiting on ahead, they closed in for the battle.

As they drew near and Buzzard dropped to a couple thousand feet, the Alouka forks there's twenty miles of low water. That's what you can get through."

"I can make it now. I know what the launch can do. After all these heavy rains, draining down that left fork from the Tah-Asah... Look there!" he pointed at the water stage on a pier—"that's eighteen inches higher than when we made our first point about here. I can get through; and once I'm in those deep water channels of the Tah-Asah—"

"All right," Alan agreed. "You'll be a mighty big help, if you put out of it, you'll be in position to carry on with them. Let's go up to the post and make our arrangements. You'll be leaving about five."

Meeting Bill in the trading hall, he introduced Pedneault and explained. They went on back to the kitchen and worked out their plans. Pedneault was to leave at dawn in the launch. Then the plane was to leave at ten o'clock. Pedneault just inside the Tah-Asah, the plane would fly ahead, locate the bandits and bring them to bay. The two craft would thus close in together for the battle.

There was but one hitch in the plan. All three men were aware of it, but no one mentioned it. These details had Joyce with them; they could and would use her for protection. How could they be swept with a machine gun's deadly spray when she was with them?

It was something which had to be left to luck or fate.

Alan gave final instructions: "If anything happens to the plane, don't try to fight those five men by yourself. Pedneault, bring wide of them, go on east to that big lake I mapped for you, and join Bill there. Then the two of you fight them to a finish."

CHAPTER XIV.

The Swan Nest

Thirty miles above the Alouka forks, they caught up with Pedneault. While that all was going well with him, Alan turned his glasses ahead again, sweeping the deep waterways within vision. He picked up two tiny black objects creeping up a broad blue channel ten miles on into the Tah-Asah.

Signaling Pedneault that they had sighted the canoes, Buzzard slowed down to stalling speed. Pedneault answered back that he understood and was ready to launch the launch into a long narrow V-shape of white froth stretched behind it. Then, waiting on ahead, they closed in for the battle.

As they drew near and Buzzard dropped to a couple thousand feet, the Alouka forks there's twenty miles of low water. That's what you can get through."

"I can make it now. I know what the launch can do. After all these heavy rains, draining down that left fork from the Tah-Asah... The two craft would thus close in together for the battle.

There was but one hitch in the plan. All three men were aware of it, but no one mentioned it. These details had Joyce with them; they could and would use her for protection. How could they be swept with a machine gun's deadly spray when she was with them?

It was something which had to be left to luck or fate.

Alan gave final instructions: "If anything happens to the plane, don't try to fight those five men by yourself. Pedneault, bring wide of them, go on east to that big lake I mapped for you, and join Bill there. Then the two of you fight them to a finish."

CHAPTER XV.

The Swan Nest

Thirty miles above the Alouka forks, they caught up with Pedneault. While that all was going well with him, Alan turned his glasses ahead again, sweeping the deep waterways within vision. He picked up two tiny black objects creeping up a broad blue channel ten miles on into the Tah-Asah.

He read the meaning of that gesture: Joyce was preparing for some sudden attack; she was signalling him to be ready.

Without a whisper of warning, so swiftly and noisily that the bandits looked around in dazed bewilderment, the half-breed in the canoe, diving headlong over the gunwale, and disappeared.

It came so suddenly that for moments Alan himself hardly comprehended what she had done. When he did realize that she had given him the signal change, his finger tightened on the trigger and the Browning leaped into play.

For twenty seconds, till there was danger of Joyce reappearing, he failed and swept the two canoes with a rain of bullets. He scorched one man, who jumped and yelled. The deadly hail drove them pell-mell in terror of their lives into shelter of the nearest flag.

Forty feet from where she had dived, Joyce reappeared a moment, cast a frightened glance back, tossed the dishevelled hair from her eyes, evened her hair, and then she disappeared under again like a young otter, making for a soggy reed on the other side of the lake.

"Low! Fly low!" Alan shouted on Buzzard's ears. "Sweep low over 'em. They'll try to get her again, if we don't force the light upon them."

With rifles snarling at them from flags below, with white puffs of smoke drifting away on the breeze, the plane sped on, diving and then four hundred feet high, it soared over the bandits, its third time, its last and fatal time.

Nearly thirty bodily by the quick wrenching manœuvres, Alan braced himself and hung grimly to the Browning as it burst at the bandits that the bandits were firing from. He killed a man; he saw the criminal fling up his arms and stagger and fall face downward in the reeds and water. With another burst, enflaming those flags from a side angle, he saw the second man stagger and fall. But that third man was given him.

The thunder of the engine suddenly slackened, the motor spluttered and died; in place of the roaring roar, Alan heard only the swirl of struts and hum of wires. In the sudden quiet he heard Buzzard's cry of consternation and saw his light partner turn a white face toward him; and he guessed the engine had been put in place of the machine gun, those snarling rifles in the flags below.

The next instant, with those rifles still blasting away, a tremor seemed to hit the plane, and the launch let it down. It lurched violently, its nose and right wing dropped, and it started a steep slide into the water. A gust of sickness, despair at this second mortal blow, Buzzard cut off ignition and battled with stick and rudder, but he would have no time, plunging into the bog under keel.

Two-thirds of a mile from the bandits, it fell heavily into the water on its starboard side, and the launch, uncertainly, righted itself and floated—just disabled, useless, out of the battle.

(To Be Continued.)

Vault Defence Against Poison Gas Planned

Germany Proposes To Build Concrete Shelters Under Highways

Germany is going to organize a powerful defence against poison gas attacks from the air.

Since she cannot build military plants she will concentrate on the protection of the civilian population against possible air attacks.

Conferences are being held in the newly established special aviation department of the Reich ministry of traffic to determine what sort of protection for the civilian population would be most effective and cheapest.

It is planned to construct bomb and gas shelters under the highways, the most important government buildings so that in case of an emergency, the highest officials could take shelter and continue to keep the government machinery going.

Had Not Forgotten

Mayor David Croft, of Windsor, Ontario, did the nicest thing we have read of in a long time, says the London Post. Himself a ragged young man years ago, he used to save his pennies and buy flowers for his mother.

Almost unnoticed, the accordion has swept into popularity as a vehicle for radio entertainment. A few years ago an infrequent visitor to the broadcasting studios, within the past year it has become a rival of the immovable piano and the handy violin.

Many Hopes Passenger

Glasgow, Scotland, believes that it has many honest, steady passengers. Because conductors and a sign asked those who had not paid to drop the penny in the box as they left. Since the plan was carried out more than \$100 a week has been collected by the box.

Accorded Is Popular

Almost unnoticed, the accordion has swept into popularity as a vehicle for radio entertainment. A few years ago an infrequent visitor to the broadcasting studios, within the past year it has become a rival of the immovable piano and the handy violin.

London secondary schools now have more than 450,000 pupils.

## Science Scores Once More

Kansans Beat From Star To Illinois in Chicago Fair

Success has been stamped on the efforts of science to reach out 240 trillion miles into the universe to inaugurate a century of progress illumination. The rare feat was accomplished May 27 to conclude gala opening day ceremonies for the Chicago World's Fair—estimated 250,000 witnessed.

Dr. Edwin H. Frost, director emeritus of Yerkes Observatory, who conceived the idea and acted as master of ceremonies for the cosmic phenomenon, said the experiment was successful and that from the distant heavens came the ray to throw the fair ground into a blaze of modern day science and light.

For this year this Arcturian light reached its destination at Chicago.

Precisely at 9:15 p.m. (C.D.T.) Arcturian light filtered through the unobscured telescopes, was enshrined by photo-electric cells, amplified and sent to the control room, and then to a master switch which flashed the fair into its first night of glory.

People Still Read Poetry

But How Much Not Fairly Indicated By Book Sales

Many of our readers have indicated to reamers us concerning the popularity of poetry in this mechanical age.

People still read poetry. Mention a poet who seems to be neglected. At once a dozen letters arrive making it clear that the neglected poet is a big seller in a small political way. There are supporters about of every known poet. Some cannot live without a touch of dear Mrs. Browning and tender Mrs. Browning, with her "drippings of warm tears." Good or bad, sentimental or severe, the way reads are sold is by the title, sales show they are purchased. When it's not the same thing.

For when there's a wedding present to be given what can be better than a set of "gift books"? The books are given. Are they read? Or do they stand as furniture upon the shelves?

We have no means of testing the matter.

We suspect that the poets suffer in these days of dangerous rivals. The huge sales of scientific and of good many technical works, the preference of an intelligent public for books of instruction, and of a less seriously public the authorities, must surely diminish the readers of poets who are said to be "useless."

—Lorita setting Robin's song.

Little Hops For This Week

"Thy servants are ready to do whatever my lord the king shall command."—Samuel 15:15.

I love to think that God appoints my portion day by day. Events of life are in his hand, and I would only say, "Apportion them in Thine own good time."

—This week's motto.

If we are really and always ready to do whatever the King appoints all the trials and disappointments arising from any change, great or small, surely do not exist. If I mean to write His messages this morning shall I grumble that He sends interrupting visitors, rich or poor, when I am to speak the messages, or for His sake. If all my members are really at His disposal why should I be put out if today's appointment is some simple work for my hands or errands for my feet, instead of some seemingly more important doing of head or tongue.—Francis H.aver-

Many Hopes Passenger

Glasgow, Scotland, believes that it has many honest, steady passengers. Because conductors and a sign asked those who had not paid to drop the penny in the box as they left. Since the plan was carried out more than \$100 a week has been collected by the box.

Accorded Is Popular

Almost unnoticed, the accordion has swept into popularity as a vehicle for radio entertainment. A few years ago an infrequent visitor to the broadcasting studios, within the past year it has become a rival of the immovable piano and the handy violin.

London secondary schools now have more than 450,000 pupils.

## Divorces in England

Seven Thousand Persons Divorced in Great Britain Every Year

One out of every 81 marriages in England ends in divorce.

There are now about 30,000 divorced persons in England and Wales—about 10 per cent. of them live in London. These are some of the facts revealed by the latest divorce records given in the register-general's annual report. Because divorces are now easier to get, more unhappy marriages are being terminated. As a result there are now five times as many divorces in a year as there were twenty years ago.

Men are petitioning for divorce in greater numbers. For years the records showed that it was the wives who got most of the divorces. But for the coming term of the law courts at which divorce cases will be tried there are 197 petitions filed by husbands and 321 by wives.

Although 7,000 persons in Great Britain are divorced through the courts, only three are re-married. Two out of every three divorced men contract new marriages, and so do three out of every five divorced women.

In three cases out of four divorced men marry spinsters. The spinster brides are usually under 30 and the husbands between 30 and 40.

In two cases out of three divorced women get husbands for their second husbands. Most of the divorced women are from 30 to 35 and they generally marry men who are five to ten years younger than themselves.

About one-half of the divorces occur within the first ten years of married life, although the general tendency is for divorces to take place later in life.

One interesting result of this unique find is the fact that the art of navigation is several centuries older than the science of what archaeologists have hitherto been able to prove, and the "Galleat Ship" also reveals an advanced skill in ship building at that remote period.

THE RHYMING OPTIMIST

By Alice Michalson

VILANAGE OF SWING

I saw the nesting robin light  
On the branch with twig in mouth,  
I sensed the feather bird's delight  
In spreading leaf and swinging bow,  
And warm wind blowing from the south.

The whistling farm boy with his  
plow,  
The farmer deep and straight and  
Gold on the green hill's brow,  
The rainbow butterflies that thrum  
The waving, many-colored grass,  
And the setting sun's red glow,  
Must joy in the world's fragrant birth,  
And share the nesting robin's mirth.

Hunting For King's Baggage

Sunk in North Sea Over 700 Years Ago Says Tradition

Fen Research Institute, London, England, is the name of a company formed to hunt for the famous baggage and regalia of King John lost in the waters of the Wash a little more than 700 years ago.

This is a change from the usual treasure hunts organized with an eye on Cooze Islands or the Spanish Main, and many think it probably will prove about as successful. Tradition says King John's baggage and regalia were lost in the Wash, and the company mentioned, appears to think tradition is right and is about to start digging for the lost treasure.

Efforts to locate the treasure by "electrical divination." The Wash is a shallow bay of the North Sea, on the Lincolnshire and Norfolk coast of England.

Many Protest Against Plan

Auto Drivers in Greece Do Not Favor Restrictions

Greece's new odd-even auto license idea is arousing much protest. The plan is that cars bearing even tag numbers may use the streets on certain days of the week and those with odd numbers the other days. The idea was to reduce imports of gasoline, but in Athens retail sales of "gas" have dropped less than three per cent. since the rule was enforced. One-car owners do not believe their machines idle half the time. Taxi men in Athens claim that cars now there are not enough.

Passengers Rying between London and Glasgow can now obtain \$10,000 insurance for the trip for \$3.00.

Tents for dogs have just appeared in London.

A Rare Museum Exhibit

Ship Believed To Have Been in Existence Over 1,600 Years

After resting in the earth for more than 1,600 years, the oldest sailing ship ever found in Scandinavia now stands forth in its former splendor in the historic museum of Gothenburg, Sweden. The "Galleat Ship," as it is called, was found about five years ago by a farmer while digging a ditch at Galleat on Sweden's west coast.

It was carefully dug out and a considerable part of it was preserved to allow complete reconstruction, which was carried out, by experts with industry and care. The ship, now shown for the first time in the Gothenburg museum, is about 14 meters long, slender-built of oak boards joined with iron nails and beautifully shaped. It was undoubtedly a most seaworthy vessel, with considerable carrying capacity, and carried a crew of 20 men.

Acquire sail. It could also be propelled by oars. By means of careful analysis both of the pollen left in the ship's hold and the surrounding geological conditions the age of the ship has been fixed at about 400 A.D.

One interesting result of this unique find is the fact that the art of navigation is several centuries older than the science of what archaeologists have hitherto been able to prove, and the "Galleat Ship" also reveals an advanced skill in ship building at that remote period.

Champion Jig-Saw Puzzler

Blind Man Claims Inability To See Is An Asset

Stanley Wartenburg, 26, of New York, blind since childhood, is a champion jig-saw puzzle maker and he claims that his inability to see is really an asset in putting the puzzle pieces together.

According to Wartenburg, color and lines in the puzzle pictures are handicaps to their rapid assembly. He is able to sort out the puzzle pieces either face up or face down and then sort out the border pieces, and then the other sections according to their shape. A remarkably trained memory is also a great asset. With his left hand he explores the curves of the puzzle pieces, and with the right seeks their mates.

Wartenburg is a industrial adviser to blind men and makes in the New York City shops of the association of the blind. He has invented many pieces of machinery used by blind workers.

New Source Of Revenue

Forgotten In England Here Forgotten Umbrellas To Commuters

Raynham Umbrellas have become a source of revenue for the Southern Railway of England. Notices are posted in suburban stations, offering to hire them out to passengers caught in a shower. Holders of commutation tickets can hire them for a rental of only a penny a day. The railway is also trying to find out what to do with the 2,000 sets of false teeth that are left in the trains every berth.

Perfectly Safe

A woman went to the bank and asked for a check book. "I've lost the one you gave me yesterday," she said. "But it doesn't matter. I lost the position of signing all the checks as soon as I got it—so, of course, it won't be any use to anyone else."

THE TOURIST INDUSTRY IS STILL ONE OF CANADA'S MAIN SOURCES OF WEALTH. Even this time of year, when the tourist season is "invaluable imports" of more than \$200,000,000.

OFF COLOUR?

HOW IS YOUR LIVER?

Wake up your Liver! Without Calomel

Young Dr. F. W. Allen, who is well known as a liver specialist, says that the liver is the most important organ of the body, and that it is the source of all the blood in the body. He says that a healthy liver is essential for good health, and that a diseased liver is the cause of many of the most common diseases of the body.

## Local Items

Miss Isobel Cox leaves on a holiday trip to England on Sunday next.

Mr. W. Campeau is adding a fine addition to his home on Fifth street.

Mrs. Geo. McKay, at 85, week to visit for a time with her daughter, Mrs. A. McKeller at Brooks.

There was a splendid attendance at the clinic on Wednesday last. In fact the attendance has been growing steadily for some time. As the nurse is going away for her holiday, no clinic will be held here until July 26th.

Mr. and Mrs. Wooding and Mr. Wooding, of Calgary, moved to town last Saturday and spent the week-end with Mr. O. Wooding.

In the account of the "W. 2. ruff — Knapper Redcliff" in our last issue, the name of Mrs. Norma Osopode was unavoidably omitted. Norma rendered her selection very well, in spite of the fact that she had had very few lessons.

The Boy Scouts are trying to earn enough money to take them to Elkwater for an outing if you have any odd jobs, like washing cars or moving boxes (ie. just phone the Scout, 325-11 or Leonard Hicks and a Scout will be at your service at short-notice.

Mrs. Sid Harper returned from Salmon Arm where she has spent two weeks with relatives.

Mrs. T. Clare and small daughter, Dalores of Portland Oregon, arrived in town Sunday to spend sometime with Mrs. Clare's parents Mr. and Mrs. W. J. Fairbairn.

The sr. W. A. of St Ambrose church will hold a bridge and whist afternoon in the parish hall on the afternoon of June 28th, commencing at 3 o'clock. Bring your partners. Every body welcome. Tea will be served. A pleasant afternoon for 25 cents.

FOR SALE — One Lloyd Local baby carriage—good condition, cheap for cash.
